PROFILE

I am a full-stack web developer and React Native developer who enjoys building scalable, user-focused applications. I focus on clean architecture, maintainable code, and continuous learning while solving real-world problems through modern web and mobile technologies.

WORK EXPERIENCES

FULL-STACK DEVELOPER

One Project One Month (2024 - 2024)

- Worked with a community team to build a full-stack POS web application using Next.js
- Developed and integrated frontend interfaces with backend functionality for core POS features

BACKEND DEVELOPER

One Project One Month (2025-2025)

- Worked on a banking service application using Java Spring Boot and gRPC
- Collaborated on designing secure, scalable service-to-service communication

FRONTEND DEVELOPER

naingcn (2025-Present)

- Built and maintained naingcn, a personal UI component library for reusable and consistent frontend development
